

3DS MAX generalist

For the most part REBUS deals with the production of high-quality and completely 3D animated product films. An other area is the visualization of technical and scientific topics in the form of 3D computer animation. See www.rebusmedia.net for more.

You're an all-rounder (m/f) with excellent skills in 3dsmax and V-Ray or MR with a couple of years of work experience. Post-production and compositing of your scenes with AfterEffects or a similar software package feels natural to you.

You're able to quickly familiarize yourself with the technical aspects of different projects and realize them afterwards, keeping your keen sense of good design along the way. Your work always shows an artistic approach with high-quality standards.

To feel comfortable with our team you should be communicative, flexible, dedicated and targeted, as well as fluid in the English language. German language is your mother tongue or you got comparable knowledge in German.

Your job is to develop ideas based on a briefing, and translate them visually in the form of 3D computer animation. Your film lets the product shine. Due to your structured and tactical approach you always manage to deliver your results in time.

If this is what you're looking for, we'd be happy to review your application, including samples of your work as well as salary expectations and the next possible starting date.
