

3DS MAX intern

For the most part REBUS deals with the production of high-quality and completely 3D animated product films. An other area is the visualization of technical and scientific topics in the form of 3D computer animation.

At the moment we're looking for an intern (m/f). The internship aims at a quick integration into the production process. A permanent employment after the internship is desired. Please check out our job offering regarding a "3dsmax generalist" for further details.

The duration of the internship might vary between 3 and 6 months, based on the progress made by the intern. Applications without work samples (online/offline) won't be reviewed.

Please send your online application to info@rebusmedia.net. Sent in media won't be returned because of time constraints. Thanks for your understanding.

Beginning: immediately

Employer-employee relationship: trainee contract

Payment: 500,00 EUR
